This Office Action is in response to the papers filed on October 15, 2003.

Claim 2 is objected to because "the circuits of the die" is should read, "the interconnect lines of the die" (see the specification at page 79, paragraph [00292]).  
Correction is required.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent 5,909,052 to Ohta et al. (Ohta).

With respect to independent claim 1, Ohta discloses a microchip (see the entire patent, including the Figs. 1-2 disclosure, for example) comprising: a plurality of dies 2 and 3, each made by a separate fabrication process and assembled into a package (note column 17, lines 19-20) with the separate die sections connected directly.

Claim 1 is thus rejected under 35 U.S.C. 102(b) as being anticipated by Ohta.

With respect to dependent claim 2, Ohta's separate die sections 2 and 3 are connected by interconnects 8 that are widened compared to the [interconnect lines] 5 and 6 of the die.

Claim 2 is thus rejected under 35 U.S.C. 102(b) as being anticipated by Ohta.
